Binary, Detour Phase, Microwave Holography

G. Tricoles and E.L. Rope. "Binary, Detour Phase, Microwave Holography." 1970 G-MTT International Microwave Symposium Digest of Technical Papers 70.1 (1970 [MWSYM]): 124-125.

The concept of detour phase has been previously used as a basis for computer-generated holograms. This paper describes the application of detour phase to produce optical holograms from microwave measurements.
