Frequency Curves

W.W. Mumford. "Frequency Curves." 1954 Transactions on Microwave Theory and Techniques 2.2 (Jul. 1954 [T-MTT]): 1-1.

A set of curves showing wavelength in waveguide versus frequency for the commonly used rectangular waveguides in the frequency range from 2600 to 11,650 mc can be obtained upon request from Frequency Standards, P.O. Box 504, Asbury Park, New Jersey.
