## Magnetron Research at Columbia Radiation Laboratory

---

*M.J. Bernstein and N.M. Kroll. "Magnetron Research at Columbia Radiation Laboratory." 1954 Transactions on Microwave Theory and Techniques 2.3 (Sep. 1954 [T-MTT]): 33-37.*

Current magnetron research and development at Columbia Radiation Laboratory is principally directed towards the production of the shortest wavelengths in the millimeter region; the development of high power in the millimeter region; the development of wide range tunable tubes; and the investigation of low field magnetron operation.
