Investigation of VHF Nonoptical Propagation between Sardinia and Minorca

J.M. Clara and A. Antinori. "Investigation of VHF Nonoptical Propagation between Sardinia and Minorca." 1955 Transactions on Microwave Theory and Techniques 3.6 (Dec. 1955 [T-MTT]): 7-12.

Announcements that VHF and UHF transmission had been found possible over distances considerably greater than classical diffraction theory had predicted, aroused considerable interest in Europe. It was felt that if such transmission proved to be reliable, there would be numerous cases where it could provide circuits more conveniently and, perhaps, more economically, than could conventional transmission systems.
