## Broad-Band Balanced Duplexers

---

C.W. Jones. *"Broad-Band Balanced Duplexers."* 1957 *Transactions on Microwave Theory and Techniques* 5.1 (Jan. 1957 [T-MTT]): 4-12.

Balanced duplexer circuits are described and a comparison is made between the two principal configurations employing gaseous switching devices. The balanced tr duplexer is limited in power-handling ability, while the balanced atr duplexer has slightly greater received-signal insertion loss. An analysis is made of the reflecting properties of an atr array, and the practical upper limit of the number of array elements is determined.
