The Professional Group on Microwave Theory and Techniques has established the Microwave Prize to recognize annually a significant paper which appeared in the IRE Transactions on Microwave Theory and Techniques. In selecting the paper, consideration is given primarily to the subject of the contribution and secondarily to its presentation. The award consists of a certificate, a monetary sum of \$100, and a feature publication in these Transactions. If the paper has more than one author, the monetary sum is to be divided equally among the authors.
