## High Power Duplexers

---

C.E. Muehe, Jr.. "High Power Duplexers." 1961 PGMTT National Symposium Digest 61.1 (1961 [MWSYM]): 35-36.

The most difficult problem facing the duplexer designer today is that of switching ever increasing powers while still maintaining short recovery time and low loss in the receiver circuit. A thorough knowledge of microwave circuits and gaseous discharge phenomena is essential.
