An Improved Pulse-Forming Network for the Generation of Phase-Coherent Microwave Signals (Correspondence)

G.F. Ross. "An Improved Pulse-Forming Network for the Generation of Phase-Coherent Microwave Signals (Correspondence)." 1969 *Transactions on Microwave Theory and Techniques* 17.1 (Jan. 1969 [T-MTT]): 52-54.

Some practical aspects of designing TEM mode networks used to produce phase-coherent pulse-modulated microwave signals through the S-band portion of the spectrum are described. In particular, design data are presented for the construction of stub junctions in a series feed network.
