Introduction (Nov. 1969 [T-MTT])

A.J. Bahr. "Introduction (Nov. 1969 [T-MTT])." 1969 *Transactions on Microwave Theory and Techniques* 17.11 (Nov. 1969 [T-MTT] (Special Issue on Microwave Acoustics)): 799-799.

What has acoustics to do with the G-MTT? The answer to that question lies in a recent amendment to the G-MTT constitution. I quote from Article III (entitled "Field of Interest"), Section 1b: "Microwave Theory and Techniques are related to electromagnetic waves usually in the frequency region between 1-100 GHz; other spectral regions and wave types are included within the scope of the Group whenever basic microwave theory and techniques can yield useful results. Generally, this occurs in the theory of wave propagation in structures with dimensions comparable to a wavelength, and in the related techniques for analysis and design. . . ."
