On High-Power Circulators with Mismatched Terminations (Correspondence)

F.E. Gardiol. "On High-Power Circulators with Mismatched Terminations (Correspondence)." 1971 Transactions on Microwave Theory and Techniques 19.6 (Jun. 1971 [T-MTT]): 561-562.

A comparison of the signal level in the ferrite-loaded sections of high-power circulators shows that the advantage presented by the coupled-line approach decreases when the device is terminated into a mismatch.
