## A 10-GHz Single Sideband Modulator with 1-kHz Frequency Shift (Correction)

---

*J.D.E. Beynon. "A 10-GHz Single Sideband Modulator with 1-kHz Frequency Shift (Correction)." 1972 Transactions on Microwave Theory and Techniques 20.5 (May 1972 [T-MTT]): 345-345.*

In the above correspondence the fourth sentence of the fourth paragraph should read as follows: "For an error of less than 2 percent (not 1 percent) in the measurement of attenuation and  $1^\circ$  in that of phase shift, the unwanted sideband must be suppressed by at least 40 dB (assuming an infinite carrier suppression)." We apologize for this mistake.
