## A New Weather Radar for General Aviation

---

G.C. Jung. "A New Weather Radar for General Aviation." 1971 G-MTT International Microwave Symposium Digest of Technical Papers 71.1 (1971 [MWSYM]): 174-176.

An analysis of the operational parameters of an airborne weather radar has resulted in the design of a far superior unit. A general outline of some of the most important factors is presented with an emphasis on the microwave area.
