## Computer-Aided Design of Broad-Band Active Matching Networks

---

*F.R. Ore. "Computer-Aided Design of Broad-Band Active Matching Networks." 1972 G-MTT International Microwave Symposium Digest of Technical Papers 72.1 (1972 [MWSYM]): 116-118.*

Described is a computer-aided technique of designing active matching networks using distributed constant circuit elements. The merits and limitations of various performance indices which have been used are discussed. Some sample designs are presented.
