Large-Signal S-Parameter Characterization of UHF Power Transistors

R.J. Chaffin and W.H. Leighton. "Large-Signal S-Parameter Characterization of UHF Power Transistors." 1973 G-MTT International Microwave Symposium Digest of Technical Papers 73.1 (1973 [MWSYM]): 155-158.

The problems involved in the measurement and application of large-signal S-parameters for UHF power transistors are discussed. Experimental results obtained using a specially designed high-power S-parameter test set are reported.
