Applications of Microwave Integrated Circuits (Panel Discussion)

"Applications of Microwave Integrated Circuits (Panel Discussion)." 1970 G-MTT International Microwave Symposium Digest of Technical Papers 70.1 (1970 [MWSYM]): 221-221.

The purpose of this panel is to discuss some of the most recent applications of microwave integrated circuits in the design of microwave components and systems. The basic questions to be answered are (1) what are some of the real and practical applications of MIC's today, and (2) what applications are planned for the immediate future?
