A Technique to Measure Submillimeter Tokamak Synchrotron Radiation Spectra

R.A. Blanken, P. Brossier and D.S. Komm. "A Technique to Measure Submillimeter Tokamak Synchrotron Radiation Spectra." 1974 *Transactions on Microwave Theory and Techniques* 22.12 (Dec. 1974, Part I [T-MTT] (Special Issue on the Proceedings of the First International Conference on Submillimeter Waves and Their Applications)): 1057-1060.

A wire-mesh Fabry-Perot interferometer with millisecond response time has been constructed. The application of this instrument to study the millimeter and submillimeter synchrotrons radiation emitted by magnetically confined Tokamak plasmas is discussed.
