## Foreword - Part II (Jun. 1977 [T-MTT])

---

*V.L. Granatstein and S.P. Schlesinger. "Foreword - Part II (Jun. 1977 [T-MTT])." 1977 Transactions on Microwave Theory and Techniques 25.6 (Jun. 1977 [T-MTT] (Special Issue on the Proceedings of the Second International Conference on Submillimeter Waves and Their Applications)): 513-513.*

At the first conference in this series which was held in Atlanta, GA, in the spring of 1974, our group at the Naval Research Laboratory (NRL) reported an initial observation of strong submillimeter radiation from an intense relativistic electron beam. In a conference that was dominated by discussions of molecular laser sources, this was the only paper describing a source based on relativistic electron beams.
