Satellite Altimetry Applications (1975 [MWSYM])

J.T. McGoogan. "Satellite Altimetry Applications (1975 [MWSYM])." 1975 MTT-S International Microwave Symposium Digest of Technical Papers 75.1 (1975 [MWSYM]): 23-25.

This paper provides the brief background of precision satellite altimetry. A description of satellite altimetry concepts and instrumentation is presented. The parameters measured, supporting data and techniques, as well as physical limitations, are discussed. In addition, results are shown and a variety of applications are emphasized.
