## Imaging RADAR Potentials for Earth Resources

---

*W.E. Brown, Jr. and C. Elachi. "Imaging RADAR Potentials for Earth Resources." 1975 MTT-S International Microwave Symposium Digest of Technical Papers 75.1 (1975 [MWSYM]): 29-31.*

The potentials of airborne and spacecraft borne imaging radars in earth resources applications are reviewed and discussed. The areas specifically addressed are: oceanography, coastal regions studies, glaciology, polar ice studies, geology, geomorphology and agriculture. The paper also addresses the main areas of emphasis for the next ten years.
