Waveguide Components for Millimeter-Wave Communications at 40-90GHz

S. Kitazume and H. Ishihara. "Waveguide Components for Millimeter-Wave Communications at 40-90GHz." 1975 MTT-S International Microwave Symposium Digest of Technical Papers 75.1 (1975 [MWSYM]): 224-228.

This paper describes the methods of construction and performance characteristics of millimeter-wave components applicable to the 40-90GHz band with particular reference to simple and novel methods of manufacture.
