A Solid-State 94 GHz Doppler Radar

F.J. Bernues, H.J. Kuno and J. McIntosh. "A Solid-State 94 GHz Doppler Radar." 1975 MTT-S International Microwave Symposium Digest of Technical Papers 75.1 (1975 [MWSYM]): 258-260.

The design, construction and performance of a small portable all solid-state Millimeter-Wave Doppler radar operating at 94 GHz are described. Design trade-offs are discussed. Laboratory and field performance data are also presented.
