Quasi-Optical Diplexers

A.A.M. Saleh. "Quasi-Optical Diplexers." 1974 S-MTT International Microwave Symposium Digest of Technical Papers 74.1 (1974 [MWSYM]): 199-199.

Quasi-optical diplexers have low-loss and high power-handling capability at millimeter and submillimeter wavelengths. This paper reviews several types of quasi-optical diplexers. Theoretical as well as experimental results will be discussed.
