Four Gigabits Per Second Millimeter-Wave Exciter-Modulator-Amplifier Module

Y. Chang, D.L. English and H.J. Kuno. "Four Gigabits Per Second Millimeter-Wave Exciter-Modulator-Amplifier Module." 1974 S-MTT International Microwave Symposium Digest of Technical Papers 74.1 (1974 [MWSYM]): 206-208.

This paper describes a solid-state oscillator-quadri-phase modulator-amplifier module operating at four gigabits per second data-rate in V-band frequency range.
