Future Microwave Markets in Telecommunications and Aviation

A.H. Solomon. "Future Microwave Markets in Telecommunications and Aviation." 1976 MTT-S International Microwave Symposium Digest of Technical Papers 76.1 (1976 [MWSYM]): 304-312.

Although the military is still the largest market for the U.S. microwave industry, growth in that sector has slowed. In response, the industry is seeking to develop commercial and industrial microwave markets where good prospects for growth exist. The most prominent of these non-military microwave markets are for telecommunications and air traffic control equipment.
