Technology Forecasting and Assessment (1976 [MWSYM])

A. Clavin. "Technology Forecasting and Assessment (1976 [MWSYM])." 1976 MTT-S International Microwave Symposium Digest of Technical Papers 76.1 (1976 [MWSYM]): 352-352.

Four experts in microwave technology will address the audience. These experts assess the impact of their technology on future components and systems. Subjects to state power generation, energy transmission via microwave, microwave packaging, and will attempt to forecast and be covered include solid millimeter waves. It is desired to have a free exchange of information and questions between the audience and panel members. A summary of both the audience and panel member discussions and comments will be published in the S-MTT Newsletter.
