## Some Experiments on Design Principle of Broadband Electrooptic Modulators (Technical Notes)

---

*E. Yamashita and K. Atsuki. "Some Experiments on Design Principle of Broadband Electrooptic Modulators (Technical Notes)." 1978 Transactions on Microwave Theory and Techniques 26.9 (Sep. 1978 [T-MTT]): 703-704.*

An experimental modulator was fabricated to test a design principle of broadband traveling-wave electrooptic light modulators proposed in a previous paper. The measured value of modulation bandwidth, 10 GHz, appears to confirm the design principle.
