West German Microwave Activity - State of the Art in Satellite Communications

H.H. Brand. "West German Microwave Activity - State of the Art in Satellite Communications." 1980 MTT-S International Microwave Symposium Digest 80.1 (1980 [MWSYM]): 195-197.

The paper deals with the West German contributions to the growing field of microwave technology with special emphasis on satcom applications. After briefly reviewing the historical development, the earth stations and some new satellite systems are described in more details. Research and development activities in industry and governmental laboratories conclude the overview.
