A W-Band Monolithic GaAs Crossbar Mixer (1984 [MWSYM])

L.T. Yuan. "A W-Band Monolithic GaAs Crossbar Mixer (1984 [MWSYM])." 1984 MTT-S International Microwave Symposium Digest 84.1 (1984 [MWSYM]): 44-46.

A fully monolithic crossbar mixer has been designed and fabricated for operation at W-band (75 to 110 GHz). A typical conversion loss of 9 dB with a variation of less than ± 0.5 dB has been measured, and a minimum conversion loss of 7.5 dB has been measured at 76 GHz.
