Recent Advances in Millimeter Wave Instrumentation for Radio Astronomy

J.M. Payne. "Recent Advances in Millimeter Wave Instrumentation for Radio Astronomy." 1987 MTT-S International Microwave Symposium Digest 87.1 (1987 Vol. I [MWSYM]): 493-495.

During the past few years major advances have been made in instrumentation for millimeter wave radio astronomy. Antennas have been built with large apertures and high precision and the sensitivity of receivers has improved greatly. This paper summarizes the more important of these advances.
