## A Low Cost, 3-7 GHz, 1/2 Watt MMIC GaAs Amplifier

---

*S.B. Moghe and R. Genin. "A Low Cost, 3-7 GHz, 1/2 Watt MMIC GaAs Amplifier." 1986 Microwave and Millimeter-Wave Monolithic Circuits Symposium Digest 86.1 (1986 [MCS]): 9-12.*

A low cost, 3-7 GHz, 1/2 Watt MMIC GaAs amplifier has been successfully designed and tested. The amplifier features small chip size (1.2 mm sq.), high gain ( $12 \pm 1.5$  dB), high power added efficiency (20%), good RF yield (57%) and high tolerance to process variations. Packaged amplifiers were built with this chip for both the 2-6 GHz and the 5.9-6.4 GHz bands. Saturated output power of 25 dBm was achieved in the 2-6 GHz band, and 27 dBm in the 5.9-6.4 GHz band.
