## Lightwave Applications in Communications -- An Overview

---

*R.H. Knerr. "Lightwave Applications in Communications -- An Overview." 1988 MTT-S International Microwave Symposium Digest 88.2 (1988 Vol. II [MWSYM]): 821-822.*

Lightwave applications now range from Kbps to Gbps systems. They include both local-data services and longhaul transmission in terrestrial and submarine applications. LAN and subscriber loop applications start to build up enough volume to allow lightwave products to be manufactured at low cost.
