## Activities in the European Optical Communications Field

---

*M.J. O'Mahoney. "Activities in the European Optical Communications Field." 1991 MTT-S International Microwave Symposium Digest 91.1 (1991 Vol. I [MWSYM]): 295-296.*

The optical communication areas reviewed in the paper mainly relate to system and network based activities. A supporting European optical component program exists, of course, but this is not covered in detail in this review.
