Intelligent Vehicle Highway Systems: Challenge for the Future

J.M. Sussman. "Intelligent Vehicle Highway Systems: Challenge for the Future." 1993 MTT-S International Microwave Symposium Digest 93.1 (1993 Vol. I [MWSYM]): 101-104.

Intelligent Vehicle Highway Systems is a new paradigm for transportation in this nation. It involves the intimation of technology in areas such as communications, information systems, sensors, and operation research methods with conventional transportation infrastructure to address many transportation issues that confront the nation at this time. It is a fundamentally new way of thinking about transportation.
