A Simple Analysis of a Symmetric Waveguide Five-Port Junction

*M.E. Bialkowski. "A Simple Analysis of a Symmetric Waveguide Five-Port Junction." 1992 *Microwave and Guided Wave Letters* 2.2 (Feb. 1992 [MGWL]): 55-57.*

A simple analysis of a symmetric waveguide five-port junction is described. Based on this analysis a computer algorithm for determining the admittance matrix parameters for the junction is developed. The validity of the algorithm is verified through the comparison with computatioually more involved algorithms and experiment.
