High-Performance Fiber-Optic Links for Microwave Applications

C.H. Cox, III. "High-Performance Fiber-Optic Links for Microwave Applications." 1993 MTT-S International Microwave Symposium Digest 93.2 (1993 Vol. II [MWSYM]): 719-722.

There have been significant improvements in the performance of fiber-optic links over the last four years. We will review some of the advances that have been made since our previous comparison between directly and externally modulated links. We will also present new data on additional link parameters for both types of links.
