Reduction of Noise and Distortion in Amplifiers Using Adaptive Cancellation (Short Papers)

A.K. Talwar. "Reduction of Noise and Distortion in Amplifiers Using Adaptive Cancellation (Short Papers)." 1994 Transactions on Microwave Theory and Techniques 42.6 (Jun. 1994 [T-MTT]): 1086-1087.

Application of adaptive cancellation techniques to feed-forward networks for amplifier linearization is discussed. Results of a test showing over 25 dB reduction in third order intermodulation products are presented.
