Foreword (Jul. 1994, Part II [T-MTT])

A.E. Atia and A.E. Williams. "Foreword (Jul. 1994, Part II [T-MTT])." 1994 *Transactions on Microwave Theory and Techniques* 42.7 (Jul. 1994, Part II [T-MTT] (Special Issue on Filters and Multiplexers)): 1285-1285.

When the first special issue on microwave filters was published in 1965, radar and land-based communications were the principal drivers behind filter requirements and specifications. Mainframe computers were beginning to be used systematically in filter design and analog swept frequency measurement techniques were starting to find their way into laboratories.
