## Introduction (Jul. 1994, Part II [T-MTT])

---

*R. Bonetti and C. Bell. "Introduction (Jul. 1994, Part II [T-MTT])." 1994 Transactions on Microwave Theory and Techniques 42.7 (Jul. 1994, Part II [T-MTT] (Special Issue on Filters and Multiplexers)): 1286-1286.*

This special issue consists of 14 full and nine short papers that span a wide range of current advances in filter and multiplexer technologies. Two invited papers address topics of high interest for the filter community, superconductivity and miniaturization technologies for mobile communications. It was a pleasure to the editors to receive contributions from both Russia and Ukraine, countries that in the past, were not able to fully share their advances in microwave technology with the West. The European community's contributions form a significant portion of accepted papers including works from France, Germany, and Italy.
