Are Linear, Nonreciprocal, Biisotropic Media Forbidden? (Letters)

A. Lakhtakia and W.S. Weiglhofer. "Are Linear, Nonreciprocal, Biisotropic Media Forbidden? (Letters)." 1994 Transactions on Microwave Theory and Techniques 42.9 (Sep. 1994, Part I [T-MTT]): 1715-1716.

Using a covariance argument due to Post for linear media, it is shown that biisotropic media must be reciprocal in electromagnetic theory.
