The 1994 IEEE MTT-S International Microwave Symposium, "Waves and Microwaves" (Dec. 1994, Part II [T-MTT])

D. Parker. "The 1994 IEEE MTT-S International Microwave Symposium, "Waves and Microwaves" (Dec. 1994, Part II [T-MTT])." 1994 Transactions on Microwave Theory and Techniques 42.12 (Dec. 1994, Part II [T-MTT] (1994 Symposium Issue)): 2351-2354.

All aspects of the 1994 International Microwave Symposium held in San Diego, California exceeded our expectations. The technical sessions were excellent and well attended with 1848 registered. The workshops and panel sessions were very popular. Over 300 registered for the Sunday workshop on Wireless Communications alone and 1381 in total in 17 different workshops. Attendance at the seven panel sessions was over 900 and 122 registered for the rump session. There were 438 exhibitor booths and an additional 40 spaces of the Historical Exhibit and university booths and an exhibit by the Navy. In total, there were over 7300 individuals at the symposium and exhibits.
