## New Types of MMIC Circulators (1995 Vol. II [MWSYM])

---

*D. Kother, B. Hopf, T. Sporkmann, I. Wolff and S. Kosslowski. "New Types of MMIC Circulators (1995 Vol. II [MWSYM])." 1995 MTT-S International Microwave Symposium Digest 95.2 (1995 Vol. II [MWSYM]): 877-880.*

Circulators can be used to separate transmit/receive (T/R) signals and for two-port tuners. Conventional ferrite devices are not applicable for MMICs. Two new types of electronical circulators are presented in this paper covering the frequency range from 1.8GHz up to 80GHz.
