## Instantaneous Model of a MESFET for Use in Linear and Nonlinear Circuit Simulations (Reply to Comments)

---

*I. Corbella. "Instantaneous Model of a MESFET for Use in Linear and Nonlinear Circuit Simulations (Reply to Comments)." 1993 Transactions on Microwave Theory and Techniques 41.10 (Nov. 1993 [T-MTT]): 2041-2042.*

I was very surprised when I received from the editor of the IEEE Transactions on MTT a letter from my friend Carlos Camacho with the comments to the paper I published in these transactions. I had no previous notice from the authors and, at first, I was pleased because I thought that the comments would address some scientific issue, which would be interesting, not only for he and me, but also for all the microwave community. But the aim of the comment was very different and now I am forced to write a rebuttal with arguments and discussions that I am afraid will not be valuable to the readers of these transactions.
