[Satellite Systems for Cellular Telephones](#)

D. Renkowitz. "Satellite Systems for Cellular Telephones." 1994 MTT-S International Microwave Symposium Digest 94.3 (1994 Vol. III [MWSYM]): 1619-1622.

An overview of a Satellite based personal communications system is given. The concepts are described in terms of the Odyssey system, now under development at TRW. System considerations, and the implications for component requirements are given. The Matrix power amplifiers to be used for Odyssey are described.
