A Highly-Efficient 7-Watt 16 GHz Monolithic Pseudomorphic HEMT Amplifier (1993 [MCS])

H.Q. Tsemg and P. Saunier. "A Highly-Efficient 7-Watt 16 GHz Monolithic Pseudomorphic HEMT Amplifier (1993 [MCS])." 1993 Microwave and Millimeter-Wave Monolithic Circuits Symposium Digest 93.1 (1993 [MCS]): 105-108.

A record cw output power of 7-W with 4.5-dB gain and 30.8 % power-added efficiency was achieved with a monolithic, single-stage, $0.25\text{ }\mu\text{m} \times 12\text{-mm}$ AlGaAs/InGaAs pseudomorphic HEMT amplifier at 16.3 GHz. At 5-W output, the power-added efficiency was 35% with 6-dB power gain. The chip size is 3-mm x 3.5-mm.
