Microwave and Millimeter-Wave Applications in Automotive Electronics

R. Dixit. "Microwave and Millimeter-Wave Applications in Automotive Electronics." 1996 MTT-S International Microwave Symposium Digest 96.1 (1996 Vol. I [MWSYM]): 31-34.

This article will survey the issues and concepts related to microwave and millimeter wave product applications for Intelligent Transportation Systems. As the article will show, there is very significant worldwide opportunity and activity in improving transportation infrastructure by using capacity and safety enhancing products.
