On the Goubau-Schwering beam waveguide using a modified paraxial approximation

K.E. Lonngren. "On the Goubau-Schwering beam waveguide using a modified paraxial approximation." 2000 Transactions on Microwave Theory and Techniques 48.5 (May 2000 [T-MTT]): 870-871.

In this paper, we demonstrate that the beam waveguide can be easily postulated by using a modified version of the paraxial approximation.
