## A highly integrated commercial GPS receiver

---

*J.P. Young. "A highly integrated commercial GPS receiver." 2000 Radio Frequency Integrated Circuits (RFIC) Symposium 00. (2000 [RFIC]): 75-78.*

The Gemini/Pisces chip set is a highly integrated GPS receiver with Pisces being one of the most highly integrated mixed signal CMOS ASICs available today in the wireless market. This single package receiver requires only an antenna for its input and houses all of the functional blocks needed to digitize the signal for the following DSP device.
