

## Leaky modes of vertically stacked microstrips at higher order

---

*Kuo-Feng Huang and C.-K.C. Tzuang. "Leaky modes of vertically stacked microstrips at higher order." 2000 MTT-S International Microwave Symposium Digest 00.2 (2000 Vol. II [MWSYM]): 1077-1080.*

The higher order leaky modes are investigated rigorously for cases with two and three microstrips stacked vertically. These coupled leaky modes move toward a lower frequency region when either the thickness or the dielectric constant of a stratified substrate is increased. These newly found leakage effects could be critical or useful for microwave circuit design.
