## 4G RF systems on chip or on module?

---

*D. Belot. "4G RF systems on chip or on module?." 2002 Radio Frequency Integrated Circuits (RFIC) Symposium 02. (2002 [RFIC]): 199-202.*

The present trend in the RF communications is to integrate as far as possible the function within a chip. Obviously the cost of a function mainly depends on the number of external components. The matter of this paper is to evaluate the limit of the integration looking at the economic topics and technical possibilities.
