RF/microwave applications in medicine with emphasis on RF ablation for the treatment of cardiac arrhythmias

A. Rosen and A.J. Greenspon. "RF/microwave applications in medicine with emphasis on RF ablation for the treatment of cardiac arrhythmias." 1998 MTT-S International Microwave Symposium Digest 98.1 (1998 Vol. 1 [MWSYM]): 5-7.

RF/microwaves are used in the treatment of cancer, arrhythmias, tachycardia, benign prostatic hyperplasia, and sleep apnea. This paper addresses the advances in RF catheter ablation for the treatment of cardiac arrhythmias.
